Paweł Białkowski

Stargazer	Logical thinker	Automation nerd	Maker	Science enthusiast
Podcasts lover	Self-disciplined	Raspberry Pi tinkerer
Kurzgesagt fan	Tech geek	35 years old	Curious soul	Motorbiker

EXPERIENCE

Junior Software Engineer

OTTO Work Force · May 2026 - Present

- Building and maintaining the recruitment website and its upcoming mobile app.
- Gathering requirements and acceptance criteria.
- Software development, code review, documentation, and debugging.
- Built an end-to-end integration between different systems.

ICT Business Consultant / Product Owner

OTTO Work Force · May 2024 - April 2026

- Managing a Django-based mobile and web application.
- Design and maintain integrations between systems using REST and SOAP APIs
- Translate business requirements into technical solutions, without compromising privacy and security standards.

Application Support Engineer

OTTO Work Force · October 2022 - April 2024

- Automated repetitive tasks with Python, SQL, and APIs — because no one wants to waste their life on copy-paste work
- Monitored SLAs and quality assurence testing without becoming a control freak
- Dealt with production issues, workarounds, and edge cases when theory meets reality

---

English Tutor - ZZP

iSpeak · April 2017 - December 2022

- Personalised learning programmes tailored to different learning styles
- Collaborated with Volksuniversiteit and UTP
- Discovered how to teach people: compare it to what they already know, make it hands-on, and keep it engaging

---

Logistiek Medewerker

Various companies | 2012 - 2019

- Order picking, reach truck driving, quality control, inventory management – the whole package
- Learned how shipping flows work in practice: labels, carrier rules, and handling errors when things break
